

If you are a visual artist interested in having information about your artistic practice on file for research and educational purposes, please include the following documents:

- **A Curriculum Vitae**, including a brief biography and a list of events and activities related to your artistic practice (including exhibitions, performances, academic and technical education, teaching and writing activities, etc.)
- **5 – 10 digital images** representative of your work. Please include any other relevant documentation (such as audio / video recordings) if pertinent.
- **Bibliography** of texts written by or about the artist (including artist's books and non-published manuscripts) and/or photocopies of the original documents (especially valuable when the originals are not accessible)
- **Permission Release form** (pdf), filled out and signed

We encourage artists to update their file annually, or as new material becomes available. Thank you for your support and contribution!
